## Arcady petrov pdf online free editor software

It's just that the Universe is the body of our own existence on the global scale. And man's every act and his every action is reflected upon the global levels of being, where planets, stars and galaxies perform the role of atoms and cells. Everything around us is alive. These forms of life are tied to the source of their existence - human consciousness. Adjustment of reality takes place through his consciousness. Being in a cause and effect relationship with consciousness, they, nevertheless, because of their predominantly information-energy structure, contain greater opportunities for analysis, response and influence than man does. SAVE THE WORLD AROUND YOU (CREATION OF THE UNIVERSE, BOOK 3) "Man maintains the homeostasis of the Universe. All the effects of extra-sensory miracles are associated with these entities within our consciousness. Let me repeat: they are not something alien or coming from the outside - they are elements of your personal consciousness in the unified field of consciousness within the Universe, just like the heart in the body, the cells in the heart, the molecules in the cells and the atoms in the molecules." If we understand and accept this we become IMMORTAL, because adequate behavior is the main precondition for immortal existence.
